

BAYLI

SAN FRANCISCO BAY AREA

The Bay Area Youth Lobbying Initiative (BAYLI), a student-based organization, centers around empowering individuals to affect long-term climate policy. We are dedicated to galvanizing students into getting involved in democracy: bridging the divide between activists and elected officials, and creating long-term change in the climate and environmental policies that will affect our generation.

Accomplishments

- Connected >40 students across >20 schools within the span of 2 months

Recent & Current Projects

- Currently working on developing relationships with all of the political offices of the Bay Area. Both state and federal!

What we're excited about

- Being able to capitalize on the opportunity to raise our voices as youth
- Rivaling big lobbyists who provide congresspeople with special interests besides the threat of climate change
- Serving as the liaison between environmentalist youth and legislators across the region

How to get involved

- Email baylibayarea@gmail.com and get integrated within the week!
- If you're a club member interested in bringing the opportunity to students: Email baylibayarea@gmail.com and we can assign someone to come give a pitch or give you more details specifically

Goals

- Establish a series of Town Halls through which students can engage in dialogue with Congresspeople.
- Extend a platform for BAYLI, as a program, to advocate for certain climate legislation
- Effect long-term Climate Policy as the generation that will be most impacted by the Climate Crisis.
